

Custom CRM vs Salesforce vs HubSpot

The honest guide for UK small businesses.

SALESFORCE

Built for enterprise sales teams.

From £20/user/month rising to £150+
once you add features you actually need.

Designed around one sales methodology.
If your process does not match,
you spend significant time configuring.

→ **Powerful. But built for someone else.**

HUBSPOT

Marketing first. CRM second.

Free tier is useful.

Features that make it a proper CRM
start at £41/month, rising steeply.

Great if your process matches
their pipeline model.

→ **Good for standard. Costly for specific.**

CUSTOM CRM

Built around how your business
manages customers.

Your terminology, stages, reports.
Your integrations.

One-time build cost.
No monthly licence fees.
No per-user charges. No price rises.

→ **Built once. Owned outright.**

THE 3-YEAR CALCULATION

HubSpot Professional:

£41/month x 36 = £1,476 minimum

Plus setup, training, integrations,
and annual price increases.

Custom CRM: £2,000-£5,000 once.

Year 2 and 3: £0 in licence fees.

Breakeven: typically 18-24 months.

→ **Do the maths for your situation.**

Not sure which is right for you?

Book a free 30-minute call.
Tell us your process and current tools.
We will tell you honestly whether
a custom build makes sense —
or whether an existing tool
is the better answer.
