

Lexalytic

What a UK Digital Studio Actually Builds

Not what the brochure says.
What we actually deliver.

Founder, Lexalytic

→ **Swipe to read**

Bespoke websites.

No WordPress. No templates.
No monthly platform fees. You own it.

A WordPress site for a similar business was costing £180/month in hosting, plugins, and maintenance. Their Next.js replacement: £0/month ongoing.

→ **This site scores 100 on Google SEO. We built it the same way we build yours.**

Custom business tools.

CRMs, rotas, portals. Built once.
Owned by you. No licence fees.

A pharmacy managing 20+ locums across spreadsheets had persistent payment errors. We built a custom tracker. Zero missed payments since launch.

→ **Built around your process. No ongoing fees. No per-user charges.**

AI-powered tools.

AI embedded in your workflow.
Not a tab someone has to open.

We built CVCraft AI ourselves. Customer submits CV, Claude rewrites it for the target role, Stripe takes payment, document delivered in 24 hours automatically.

→ **CVCraft AI: no humans between submission and delivery.**

Data systems.

Power BI connected to your live data.
Reports that build and send themselves.

A professional services firm waited a week for someone to compile a management report. Now it is in their inbox automatically every Monday at 8am.

→ **Full visibility in 48 hours. The MD now opens one dashboard, not ten.**
