

Custom Software

5 Signs Your Business Has Outgrown Your Software

A practical guide for UK business owners

Swipe to read →

Your team builds workarounds.

Exporting data manually.
Entering things twice.

→ **Workarounds are a signal, not a fix.**

You pay for features you never use.

While missing the ones
you actually need.

→ Off-the-shelf fits every business except yours.

New starters need training on the workarounds.

Not just the software.
How you actually use it.

→ If the gap needs training, the tool is wrong.

Data lives in too many places.

A short orange horizontal line.

Nobody is sure
which version is current.

→ **Scattered data is a systems problem.**

The monthly cost is rising but value is not.

SaaS pricing only goes
one direction.

→ Do the 3-year cost calculation.

Sound familiar?

A custom tool built around your process typically pays for itself in 12-18 months.
